

### NON VENTED SAFETY HELMET MODEL NO. H1S

Patron non-vented safety helmet is a protective headgear designed to provide maximum protection against impact, falling objects, and other hazards without the inclusion of ventilation holes or slots found in vented helmets. Unlike vented helmets, which prioritize airflow and breathability, non-vented helmets offer a solid, uninterrupted outer shell that provides enhanced protection in environments where ventilation is not a primary concern

#### SPECIFICATION

- Material : HDPE
- Impact-Resistant : Superior protection for your safety
- Comfort Fit: Adjustable straps and padding for a snug feel
- Closure System : Slip Ratchet
- Stylish Designs: Merge safety seamlessly with your style
- Certified Safety: Exceeds industry standards for reliability
