

### LIFEGUARD HOOK WITH TELESCOPIC POLE

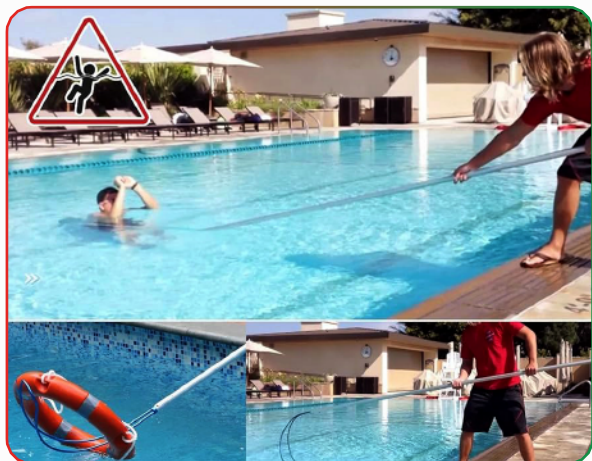

MODEL NO. JGR3 / JGR5

A lifeguard rescue hook with telescopic pole is a specialized safety tool used by lifeguards for rescuing swimmers in distress, particularly in pools or other water environments. It is designed to reach individuals who are too far to be safely reached by hand and to help pull them to safety. The hook is attached to a telescopic pole, which allows the lifeguard to adjust its length for better reach and flexibility

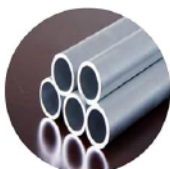

#### SPECIFICATION & FEATURES

- **Telescopic Rod:** The silver telescopic rod pole is extendable, typically ranging from 3 to 5 meter, and can be adjusted to different lengths, allowing lifeguards to safely reach swimmers at varying distances in the pool or water. The telescopic design makes it easy to store and transport
- **Rescue Hook:** Blue curved life saving hook to securely latch onto a swimmer's arm, wrist, or life jacket. This allows the lifeguard to pull the individual to safety
- **Safety and Efficiency:** The telescopic lifeguard hook allows lifeguards to maintain a safe distance from distressed swimmers, preventing potential danger while still offering an effective means of rescue

#### IDEAL FOR :

Emergency rescue & Training and safety drills, Maintenance of pool safety & public and private pool lakes and other still water areas & school or community pool facilities

High-quality aluminum alloy  
is not easy deform

Inferior aluminum alloy, easy  
to deform, short service life

#### COLOR

HOOK : BLUE  
ROD : SILVER

#### MATERIAL

ALUMINIUM  
ALLOY

#### SIZE

3M / 5M

#### PACKING

30 PCS / CTN

#### ORIGIN

CHINA
