ASTM F2413

S1P

### SIZE:

38-48

### WEIGHT:

0.870 Grams / Pair (Size 42)

### PACKING:

1 Pair in each box, box size: 32\*23\*12 CM

10 Pairs in one carton, carton size: 62\*48\*33 CM

### SHELF LIFE AND WARRANTY:

1 Year shelf life. 6 Months warranty to be kept in its original packaging, under normal temperature in clean, covered and ventilated premises.

### SPECIFICATION:

Upper	: Leather & Fly Knett Mesh
Lining	: Antibacterial Lining
Sole	: PU Injection
Closure System	: H/D Lace
Toe Cap	: Steel Toe cap to resist 200j
Insock	: Breathable PU insock
Penetration	: Steel Plate 1200 Newttons.
Origin	: India
Standard	: S1P

### Insole :

PU insole with comfort fit and antimicrobial feature. Shock absorbing insole reducing the stresses on the joints and soft tissues of the body. Insole with fast drying benifit makes wearer feel comfortable for longer hours.

### INDUSTRY:

Patron Safety LLC, 3500 South Hwy, Dover DE 19901,

Zip Code : 19901, United States of America ✉ info@patron-safety.com

## Take comfort in the safety features

Classification	Test Performed	Safety Standards				
		S1	S2	S3	SBP	S1P
SB	Toe protection tested with 200J impact and 15kN compression force	✓	✓	✓	✓	✓
P	Penetration resistant outsole tested at 1100 newtons			✓	✓	✓
A	Electrical resistance between foot and ground of between 0.1 and 1000 mega ohms	✓	✓	✓		✓
E	Energy absorption of the seat region tested at 20 joules	✓	✓	✓		✓
WRU	Water resistant upper leather		✓	✓		

## Additional test classification

HRO	Heat resistant outsole compound tested at 300°C
CI	Insulation against the cold - temperature drops less than 10°C when tested at -17°C
M	Metatarsal protection - tested to 100J impact
SRA	Slip resistant on ceramic tile floor with sodium lauryl sulphate solution
SRB	Slip resistant on steel floor with glycerol
SRC	Slip resistant for both SRA and SRB

## Foot Comfort Advice

When you spend all day on your feet, discomfort can cause all manner of medical problems, beyond simple aches. We've spent years researching the strains your feet come under and have prepared this chart to help you diagnose and alleviate some common causes of discomfort.

Complaint	Possible cause	Suggested action
Ingrowing Toenail Very painful if knocked.	Nails cut too short.	Cut nails square and wear wide fitting footwear with padded interior to protect toes.
Aching feet	Stiff footwear or footwear that flexes in the middle of the arch instead of at the ball of the foot.	Wear footwear with a shank – this means footwear bends with the foot and not against it.
Athlete's foot A fungal infection that thrives in dark damp places.	Sweaty footwear, or damp footwear that has not been allowed to dry out. Fungal infections can spread very quickly from one foot to the other.	Wear breathable footwear and make sure shoes dry out well overnight. Full grain leather is essential if leather footwear is required. Buy a new pair of insoles and use a recommended powder, available from chemists.
Hammer toe Toe(s) curl over and stiffen in an unnatural position.	Footwear that is too small or too narrow, causing toes to bunch up.	Wear footwear that is wider fitting and the correct size. All the Patron Safety Footwear is wide fitting.
Bunions/corns Hard patches of skin on toes.	Narrow-toed ill-fitting footwear.	Wear wider fitting footwear to ensure feet have plenty of room.
Plantar fasciitis Inflammation of tissue on the bottom of the heel.	Poor quality footwear with little or no shock absorption.	Wear the V Shok II footwear to cushion the heel and consult your doctor.
