

2 PLY POLYESTER WEBBING SLING 4:1

MODEL NO. WS33

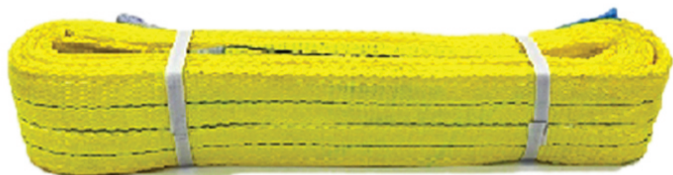

2-ply webbing sling is a lifting and rigging accessory designed for heavy-duty applications. It consists of two layers or plies of high-strength synthetic webbing material stitched together, enhancing its load-bearing capacity and durability. This type of sling is commonly used in industries such as construction, manufacturing, and logistics for lifting and securing heavy loads. The two-ply construction provides added strength and stability, making it a reliable choice for various lifting and material handling tasks.

SPECIFICATION

- Material : High Streangth Polyester
- Capacity : 3 Ton
- Aspect Ratio : 4:1

FEATURES

- Strength and Durability
- Color-coded
- Flexibility For Secure and efficient use
- Weather Resistance
