

HAND PALLET TRUCK

MODEL NO. HPT-5000

Patron Hand pallet truck is a manual material handling device used for lifting and moving palletized loads. It features forks that fit under pallets, a hydraulic pump for lifting, and wheels for easy transport. Operated by a handle, the user lifts the load and maneuvers it with minimal effort, making it a practical and cost-effective solution for moving goods in warehouses and similar environments

SPECIFICATION & FEATURES

- Material : Robust Metal
- Load Capacity : 5000 KGS.
- Hydraulic Pump: Features a manual hydraulic pump mechanism for easy lifting of loads
- Load Rollers : Often designed with entry rollers to ease pallet entry and exit.
- Affordability : Generally more cost-effective compared to powered lifting equipment
- Low Maintenance : Requires minimal maintenance, contributing to overall cost efficiency
